

# Aerial UHF 31 Element F Balun 4G O2MM-MDU31

The O2MM-MDU31 features an X type design, which makes it a great choice for that antenna arrangement. X types are noted for their increased gain and performance, and this unit is no exception, boasting a maximum gain of 11dB. The unit itself is made from a durable UV-resistant black plastic.

## Features and Benefits

- » 'X' type element for increased gain and wideband performance
- » 'F' type PCB Balun for quick installation and improved VSWR
- » UV resistant black plastic

## O2MM-MDU31 Specifications

Elements	31
Channels	(21-50)
Frequency Range	470-694MHz
Maximum Gain	11dB
Front/Back Ratio	>18dB
Balun Type	'F' Type PCB 4G Filter
Packing Unit	Inner 1, Outer 5
